

PERFORMANCE VENUE SYSTEM DIAGRAM

From the main auditorium, studios and smaller performance spaces, one powerful, simple integrated system meets the performance requirements for entertainment venues, houses of worship and even festival.

Venues with multiple performance areas can benefit from 4REA4's ability to mix up to four areas at once. Any combination of connections can be shared, routed and mixed as needed. Manage multiple show configurations, switching in an instant. With a variety of connection options from analogue to the latest audio networking technology you can provide connectivity anywhere you need it and with our elegant controllers, smaller areas can be mixed without taking valuable space in your venue.
