SD8 MIXER
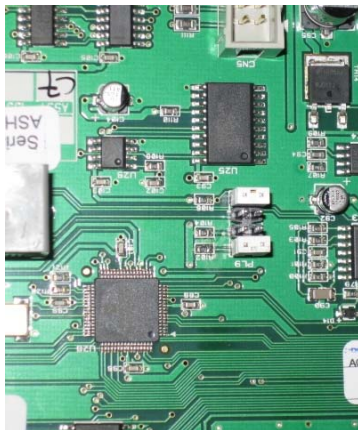

INTERNAL JUMPER SETTINGS

P16032A fader drive PCB
Note the same PCB is used for both inputs and master, their function is set by jumpers. The function and programming jumpers are marked PL9 and approximately at the centre of the PCB.
The upper pictures show the jumpers in normal run mode.
The lower pictures show the jumpers in special external programmer mode (NOT used with internal upgrade program).

NORMAL MODE

Left section (not on SD8-24)   centre section   right section

PROGRAM ONLY MODE

Do NOT move the run mode jumper in normal use.

P16034 Local audio IO PCB
The programming link is adjacent to the programming socket
